

CL-1

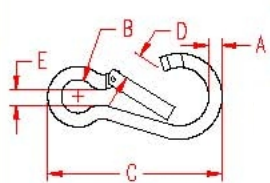

PVC FLEXIBLE HOSE/POWER CORD CLAMP

The CL-1 clamps are designed for use with the GAS MASTRRR series submersible chemical induction units to secure the flex hose and power cable to the lifting wire rope. This eliminates the potential of damage to the hose or cable in high velocity water flows.

The clamps are constructed from 316 stainless steel materials for long term duty in harsh water, wastewater, or CSO basin installations. The u-bolt must be specified for 3/4"-2" hose size.
