

RGA, WARRANTY AND EXCHANGE POLICY

We have an exact procedure which you must follow to secure rapid response to Warranty claims.

- 1) Report field problem and secure blank Return Goods Authorization (RGA) form.**
- 2) Fax the completed RGA form to us at 281/648-8704. The RGA form must include the requested information, including copies of maintenance data sheets. Failure to furnish completed form will only delay authorization to return.**
- 3) An RGA # will be used and supplied to you via THE MASTRRR COMPANY or your local representative.**
- 4) Return unit prepaid and include copies of installation data sheet along with maintenance records to:**

**THE MASTRRR COMPANY
507 South Eagle
Weimar, Texas 78962
Tag: RGA #**

- 5) Unless we receive the RGA return unit, we will invoice you at full price for any units shipped on exchange or warranty.**
- 6) The return unit together with installation and maintenance records are inspected and judged for warranty consideration. Failure to produce detailed maintenance records will seriously jeopardize warranty claims.**

Units returned damaged by freight carrier will not be accepted unless you insured freight.

Units showing obvious damage to rotating distributor must be reported on RGA form. Units showing obvious motor damage must be reported together with explanation as to why motor protection monitor and (overloads) failed to prevent motor burnout.

- 7) Units returned for warranty inspection within the 1 year warranty period will be disassembled for inspection. Units deemed warranty will be rebuilt, repaired or a new unit will be shipped back as a warranty unit. The original warranty period is still in affect. A warranty unit does not extend or include a new 1 year warranty. Units deemed non warranty are eligible for exchange. Units out of the warranty period will be disassembled for inspection and not reassembled. All units are eligible for exchange. Old units will not be rebuilt. Components will not be returned unless specified in writing on RGA form. Returned parts will be at customers freight expense. Call tag must be issued. The MASTRRR COMPANY can not guarantee that all components will be returned.**
