

INTRUDRRR SERIES 35FP FLANGED/IN-LINE CHEMICAL MIXERS

SERIES 35FP FLANGED/IN-LINE MIXER

The INTRUDRRR series 35FP is a flanged/in-line high rate mixer designed for flash mixing of liquid chemicals into pipelines or closed conduits. They easily install vertically or horizontally through 6", 8", or larger ANSI flanges providing superior velocity gradient mixing intensity in 6" and larger pipelines. The series 35FP is supplied with a 316 stainless steel packing gland flange & insertion/retraction system for unit installation and removal from the pipeline under pressure/flow conditions.

The series 35FP is designed for non-vacuum flash mixing of liquid chemicals into pressured lines when chemical metering pumps are used to supply the chemicals and overcome pipeline head pressure. They are supplied with two isolated chemical feed ports for multiple chemical feed applications.

The series 35FP utilizes a close coupled rugged and reliable U.S.A. manufactured TEFC severe duty chemical process motor for indoor/outdoor service in corrosive environments.

The INTRUDRRR series 35FP is available in 2 - 25 HP ranges for feed rates up to 60 GPM of liquid chemicals.

The INTRUDRRR series 35FP utilizes a Hasteloy-C propeller for a high GPM axial dispersion of the chemical mix in small or large diameter pipelines. Optional 304 or 316 stainless steel knife gate valves may be supplied in 6" or larger flange sizes. **NOTE:** 6" concrete lined pipe stubs may require concrete removal to allow barrel to insert smoothly.

Performance Specifications

Model No.	HP	Flange Size (inches)	Maximum Liquid Induction GPM	Propeller Diameter O.D. (in.)	Propeller Discharge	
					GPM	Velocity (f/s)
Series 35FP-2	2	6 or 8	10	4	725	18.5
Series 35FP-3	3	6 or 8	20	4.75	1,050	18.6
Series 35FP-5	5	6 or 8	25*	5	1,150	19.2
Series 35FP-7.5	7.5	6 or 8	30*	5.5	1,565	21
Series 35FP-10	10	8	40*	6	1,985	22
Series 35FP-15	15	8	50*	6.5	2,565	24
Series 35FP-20	20	8	60*	7	3,150	26
Series 35FP-25	25	8	70*	7.5	3,925	28

25 HP used for extreme applications where additional mixing intensity is required in large diameter pipelines or closed conduits.

*Maximum feed rate may vary dependent on chemical feed equipment manufacturers meter pump capacities, supply piping size and length, chemical viscosity, and the pipeline pressure. A larger HP CIU may be required to meet mixing (G-value) requirements. HP range is selected by chemical feed rate, pipeline size, peak pipeline flow rate, and (G-value) mixing requirement.

The INTRUDRRR series 35FP is proudly made in the U.S.A. and is backed by a 1 year limited warranty. **THE MASTRRR COMPANY** offers an exclusive exchange program for competitive in-line mixers. Contact us for our exchange policy details.
